Figure 10-15: Information Signs for Bicycle Parking Facilities

Figure 10-16: Pavement Symbol (for use under parking rails and at other bicycle parking facilities)

Australian Standard AS 2890.3 suggests the use of the standard bicycle pavement symbols sign with additional plates as shown in Figure 10-15. The message on the lower plate should normally read either Bicycle Lockers, Parking Enclosure, Parking Rails or Parking. However, another message may be required if special circumstances exist.

It is suggested that the bicycle rails shown in Figure 10-8 and Figure 10-10 should have a small painted bicycle pavement symbol (Figure 10-16) painted on the pavement beneath them so that the purpose of the rails is clear. An alternative is to stencil 'Bicycle Parking' on the device.
