## CENTRAL AREA STREET SIGHT LINES

### EXPLANATORY NOTE

Views are composed of focal and context elements. The focal point or points are what views concentrate on. Context elements place the focal element in its setting in the Cityscape. A small number of the sightlines include important streetscapes.

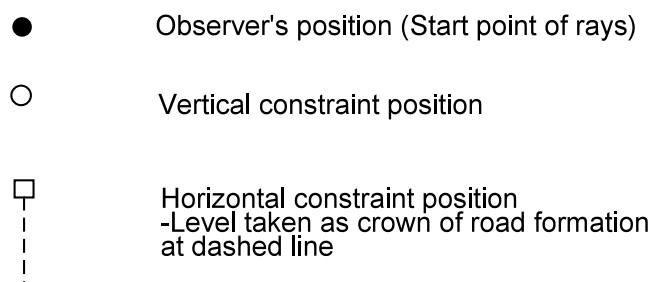

This rule does not apply beyond the streets affected.

#### Street Sight Lines Key

##### VIEWS - View frame

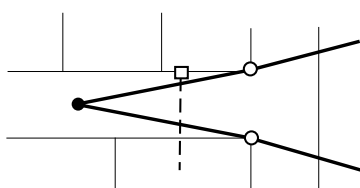

##### PLANS - On property base

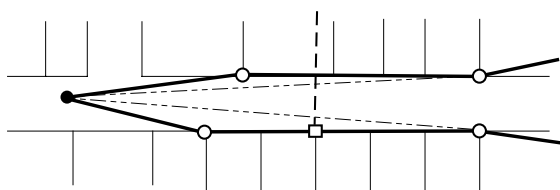

##### EXAMPLES - Nearest circles define view frame

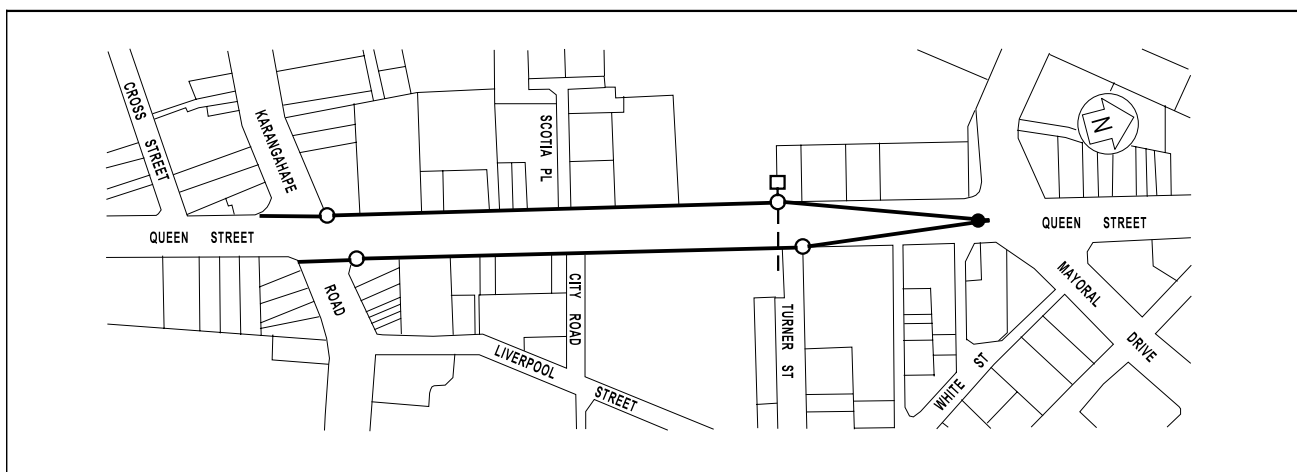

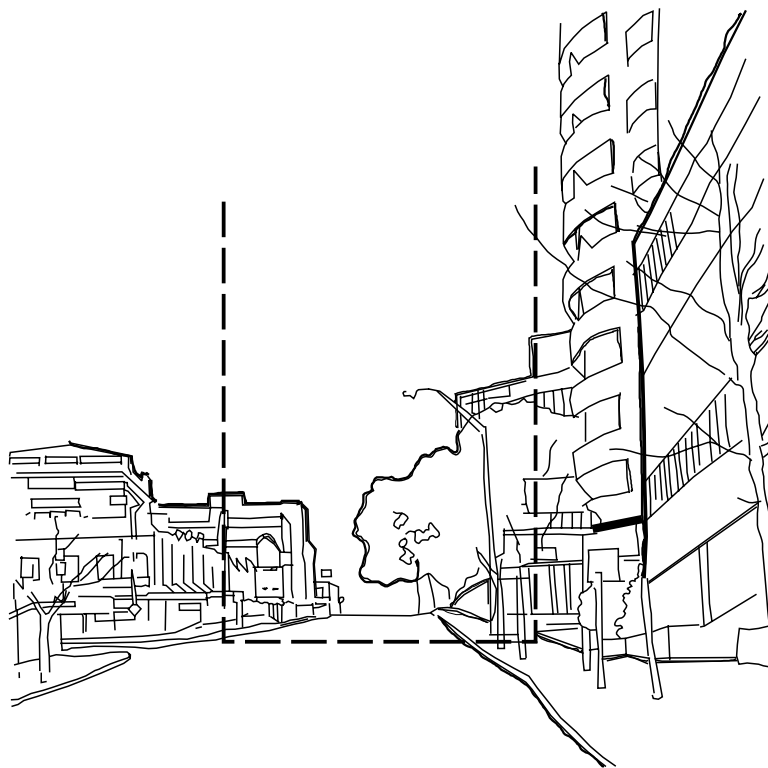

Two simple rays to define a street sightline

A complex situation consisting of two initial rays, two lines following the street frontages, and two final rays
