

Chapter 6 — Heritage

CONTENTS

This chapter is presented as follows:

6.1 Introduction

This outlines how heritage is defined and the statutory context of this chapter.

6.2 Resource Management Issues

This outlines the significant resource management issues relating to heritage resources within the City.

6.3 Objectives

This sets out the overall desired environmental outcomes for the heritage resources of the City.

6.4 Policies

This describes how Council intends to ensure that the objectives for the City's heritage resources are met. An explanation of the policies is given. A summary of the range of methods that are used to implement each policy is also included.

6.5 Heritage Strategy

The strategy summarises the overall approach to managing the City's natural and cultural heritage resources.

6.6 Implementation

This broadly describes the regulatory and non-regulatory methods used to implement the policies for the management of the City's heritage resources.

6.7 Anticipated Environmental Results

This outlines the environmental outcomes anticipated from the implementation of the policies and methods as set out in the Heritage Chapter.

6.8 Procedures for Monitoring

This outlines how Council will monitor the effectiveness of the Heritage provisions.

6.9 Rules — Activities

This sets out in an Activity Table the permitted and discretionary activities for the scheduled heritage resources of the City.

6.10 Rules – Matters for Control: Controlled Activities

6.11 Rules – Matters for Discretion: Specified Restricted Discretionary Activities

6.12 Rules – Assessment Criteria: Discretionary Activities General Assessment Criteria

SCHEDULES

Schedule 6A Buildings and Objects to be Protected

Schedule 6B Notable Trees and Stands of Trees to be Protected

Schedule 6C Species of Trees to be Protected

Schedule 6D Wetlands to be Protected

Schedule 6E Geological Features and Areas to be Protected

Schedule 6F Waahi Tapu to be Protected

Schedule 6G Archaeological Sites to be Protected

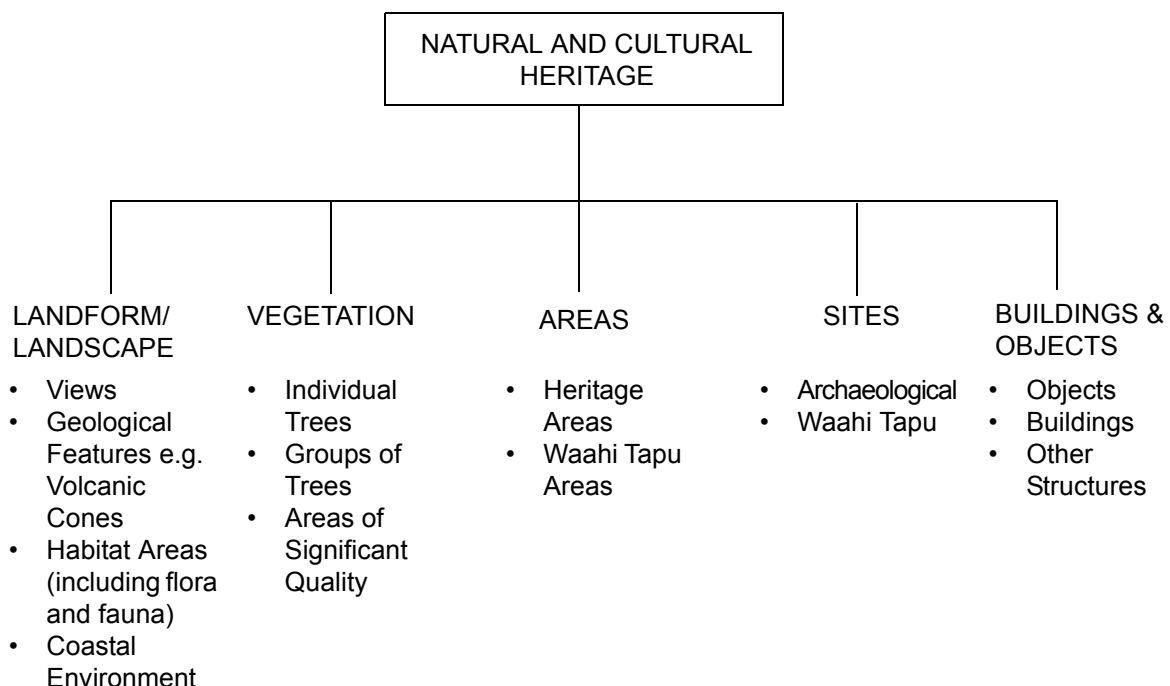

Appendix 6A: Evaluation Criteria

6.1 INTRODUCTION

Titiro ki nga wa o mua,
 Ki te whakamarama i tenei Ao.
 Rapua te mea ngaro,
 Hei maramatanga mo nga Ao
 e eke mai
 Look to the past,
 to understand the present,
 and seek the answers for the future

The place known as Manukau has long been chosen as a place to live. There are many factors which have attracted people to Manukau. These include its natural environment with its extensive eastern and western coastlines with their access to fisheries; the harbour areas for sheltered mooring; the inland waters and river systems (such as the Tamaki, Mangemangeroa and Wairoa rivers); the hill country and areas of significant bushland; the high quality soils of low lying and valley areas; and the volcanic landforms. All these resources are entwined in providing the past, present and future heritage of Manukau. A history has evolved in relation to these resources. The human associations with them over time create a special heritage for Manukau.

Manukau's heritage encompasses a diverse range of elements including arts, music, language, buildings and landforms. The Resource Management Act 1991 is concerned with the heritage associated with our natural and physical resources. This is sometimes referred to as natural and cultural heritage respectively, and is seen to include the following resources as well as people's relationship with these resources:

For the purposes of the District Plan, heritage is therefore defined as: **“those attributes, from the distant and more recent past, that establish a sense of connection to former times, contribute to community identity, sense of place, and spirituality, that people have a responsibility to safeguard for current and future generations.”**

6.1.1 STATUTORY CONTEXT

Under the Resource Management Act, there is a positive obligation on Council to have particular regard to the recognition and protection of the heritage value of sites, buildings, places or areas. In undertaking its duty under the Act to promote the sustainable management of natural and physical resources the Council must:

- recognise and provide for matters of national importance, Section 6:
 - "(a) the preservation of the natural character of the coastal environment (including the coastal marine area), wetlands, and lakes and rivers and their margins, and the protection of them from inappropriate subdivision, use, and development;*
 - (b) the protection of outstanding natural features and landscapes from inappropriate subdivision, use and development;*
 - (c) the protection of areas of significant indigenous vegetation and significant habitats of indigenous fauna;*
 - (d) the maintenance and enhancement of public access to and along the coastal marine area, lakes, and rivers:*
 - (e) the relationship of Maori and their culture and traditions with their ancestral lands, water, sites, waahi tapu, and other taonga;*
 - (f) the protection of historic heritage from inappropriate subdivision, use and development:*
 - (g) the protection of recognised customary activities."*
- have particular regard under Section 7 to the following matters:
 - "(a) Kaitiakitanga;*
 - (aa) The ethic of stewardship:*
 - (b) The efficient use and development of natural and physical resources;*
 - (c) The maintenance and enhancement of amenity values;*
 - (d) Intrinsic values of ecosystems:*
 - (e) Repealed;*
 - (f) Maintenance and enhancement of the quality of the environment:*
 - (g) Any finite characteristics of natural and physical resources:*
 - (h) The protection of the habitat of trout and salmon:*
 - (i) The effects of climate change:*
 - (j) The benefits to be derived from the use and development of renewable energy".*
- take into account the principles of the Treaty of Waitangi (Section 8).

[AM89]

The Resource Management Act makes local authorities Heritage Protection Agencies. The Act also provides for authorised parties to become heritage protection authorities and to require local authorities to place heritage orders on property for the purpose of protecting:

- “(a) Any place of special interest, character, intrinsic or amenity value or visual appeal, or of special significance to the tangata whenua for spiritual, cultural and historical reasons; and*
- (b) Such areas of land (if any) surrounding that place as is reasonably necessary for the purpose of ensuring the protection and reasonable enjoyment of that place.” Section 189(1)*

A Heritage Order is a mechanism additional to the general provisions of the Plan. Sites which have had heritage orders served on them will be noted in the schedules.

In addition, the Historic Places Act 1993 protects all archaeological sites (sites which are the result of human activity prior to 1900) from unauthorised damage. There is also provision in the Act to declare post-1900 sites “archaeological sites” if they are able to provide significant evidence relating to the historical and cultural heritage of New Zealand. Under the Historic Places Act an application must be made to the NZ Historic Places Trust for an authority to destroy, damage or modify an archaeological site. This includes sites that are not recorded, but which are subsequently discovered as a result of development or other activity, as these are also protected by the Historic Places Act 1993. It is also noted that if cultural evidence or remains are found, landowners are legally required to contact the New Zealand Historic Places Trust.

6.2 RESOURCE MANAGEMENT ISSUES

Issue

6.2.1 **The heritage of Manukau City has been depleted and continues to be under threat because of the City’s rapid rate of development.**

Manukau City imposes significant pressures on its heritage resources because it is one of the fastest growing areas in New Zealand. Many heritage resources and values are sensitive to change. Heritage buildings, for example, are fragile in a constantly changing urban environment, and are susceptible to change through peoples’ desire for modern conveniences. Neglect is also an issue with many of the older homes requiring considerable maintenance which, if done in keeping with the period of construction, may be more costly than using today’s materials and techniques.

Archaeological sites are particularly vulnerable in an environment where there is growth and development, because they are often unrecorded and not easily identified without assistance from kaumatua or trained archaeologists.

Trees make the City a desirable place, acting as landmarks and enriching the landscape with distinguishing quality and appeal. Tree cover within the City, however, can be compromised by a rapid rate of development.

Fifty years ago, the landforms of 19 volcanoes in the Manukau City area were virtually intact. In the last few decades, the volcanic heritage of the City has been destroyed with many volcanic cones being virtually completely removed. There is very little of the City’s volcanic heritage left. In such a dynamic environment the protection of our sensitive heritage resources is vital.

Issue

6.2.2 **Tangata whenua and their relationship with taonga have been and continue to be, adversely affected by development even though the principles of the Treaty of Waitangi**

include active protection, and the Treaty of Waitangi gives tangata whenua values a priority when their taonga are adversely affected.

The heritage of tangata whenua is considered “taonga” (something highly prized/treasured). Taonga can be seen and unseen. Physical expressions of taonga include waahi tapu such as pa, marae, papakainga, tribal ara (tracks), urupa, battle sites, maunga (mountains) and tauranga waka (canoe landings). Tangata whenua’s strong spiritual relationship with waahi tapu means that even when such places have passed out of their ownership or have been damaged/destroyed or desecrated these places can still be highly valued and tapu (sacred).

Historical developments have meant that much of tangata whenua heritage has passed out of their ownership, through land confiscations (raupatu whenua), illegal land acquisitions, individualisation of title contrary to tribal ownerships, and legislation contrary to the Treaty of Waitangi (eg Native Land Act 1862, NZ Settlements Act 1863, Native Reserves Act 1864 and Native Land Act 1865). This has affected the protection of waahi tapu. The Waitangi Tribunal has found that failure to actively protect taonga is contrary to the principles of the Treaty of Waitangi. The Council has a statutory responsibility, by virtue of Sections 6, 7 and 8 of the Resource Management Act, to promote processes and mechanisms that will provide better protection of taonga. [AM89]

6.3 OBJECTIVES

Objective

6.3.1 To preserve or protect the heritage values of a diverse and representative range of natural, physical and cultural resources within Manukau.

(This objective relates to Issues 6.2.1 and 6.2.2).

Objective

6.3.2 To actively protect tangata whenua taonga from being damaged, destroyed or desecrated.

(This objective relates to Issue 6.2.2).

6.4 POLICIES

Policy

6.4.1 Those heritage resources preserved or protected should reflect the variety of contexts and communities within the City.

(This policy relates to objective 6.3.1)

Explanation/Reasons

While acknowledgement of built form heritage is longstanding, increasingly there is also recognition that other elements of natural and cultural heritage contribute to a sense of identity and place and consequently form part of the City’s cumulative history, its character and identity. The focus on built form heritage is significant in the identification and listing of buildings and objects, these being ranked for their architectural and representative uniqueness as well as community identity and sense of place. The more recent focus on heritage values inherent within urban environments, trees and sites associated with or which commemorate significant landscape values in rural areas that contribute to the City’s heritage.

Furthermore, heritage includes the spiritual relationships people have with the environment. The strong spiritual and cultural significance of tangata whenua taonga remains even when the site or area has

passed out of their ownership or been damaged, destroyed or built on. These places are still highly valued and remain tapu (sacred).

As well as its regulatory functions Council also has a role in heritage advocacy and education increasing the community's knowledge and appreciation on heritage generally and the City's unique set of heritage resources in particular.

Methods

- Scheduling that identifies a diverse range of heritage resources (e.g. wetlands, buildings, objects, waahi tapu archaeological sites and trees)

Information — promotion of the City's heritage

- Heritage Zoning
- Resource consent procedures which include assessment of effects on heritage resources
- Ongoing heritage assessments of the City's resources
- Acquisition — for example public open space containing items of heritage significance

Policy

6.4.2 Adverse effects of development on the City's heritage resources should be avoided, remedied or mitigated.

(This policy relates to objective 6.3.1)

Explanation/Reasons

The preservation or protection of heritage resources enhances the overall quality of the City's fabric and recognises the contribution that heritage makes to the City's image and form. Resources can have heritage worth because of particular historic, scientific, environmental, visual, community or educational importance. Heritage resources are vulnerable to change and once lost cannot be replaced.

Methods

- Surveys/Identification
- Scheduling
- Requirement of Assessment of Effects on Heritage Resources
- Advice notes on Land Information Memorandum relating to Heritage Resources
- Notification provided to the Historic Places Trust of Project Information Memoranda relating to Heritage Resources registered by the Trust
- Non-regulatory methods, eg pamphlets, guidelines

Policy

6.4.3 Adverse effects on tangata whenua taonga and their relationship with taonga should be avoided, remedied or mitigated.

(This policy relates to Objective 6.3.2).

Explanations/Reasons

The principles of Te Tiriti o Waitangi include active protection of taonga and Section 6(e) of the Resource Management Act requires the recognition and provision for the relationship of Maori people with their taonga. The High Court has indicated that the relationship with ancestral taonga can exist despite land sales and dispossessions of taonga. Even where taonga are still in tangata whenua's ownership, the relationship with it can still be adversely affected by the nature of surrounding development.

Methods

- Involvement of tangata whenua authorities in the vetting of resource consent applications for assessment of effects
- Taking into account Iwi Planning Documents in resource consent processes (Chapter 5 — General Procedures and Rules)
- Scheduling of waahi tapu and archaeological sites
- Co-management of taonga in the Council's ownership (eg. taonga on public open space.)
- Public acquisition of waahi tapu

Policy

6.4.4 Public awareness of the City's heritage resources should be increased and the public encouraged to contribute to the protection of these.

(This policy relates to objective 6.3.1).

Explanation/Reasons

The ability to protect heritage items by regulatory control is limited, however the Act does make provision for heritage orders to protect heritage items. The need to be able to buy the property if the restriction on private property owners is too great will limit the application of heritage orders by Council. Regulation must be applied carefully because the Resource Management Act requires that controls should not unreasonably restrict property rights. The majority of the City's heritage will therefore not be subjected to regulatory control and its continued existence will be dependant on the co-operation and spirit of the people of the City. As the protection of the City's heritage is reliant on the goodwill of individuals, it is important to increase people's understanding of heritage values.

Methods

- Rules
- Pamphlets
- Incentives

Policy

6.4.5 Heritage resources should be used in a manner that ensures that the essential heritage qualities are not damaged or destroyed.

(This policy relates to objective 6.3.1).

Explanation/Reasons

Appropriate uses of heritage resources should be encouraged provided they do not compromise the features for which the resource is valued or have an adverse effect on the surrounding environment. With respect to heritage buildings for instance some modifications, in accordance with recognised conservation standards, may be required to accommodate such uses; this is preferable to a building becoming disused and therefore vulnerable to deterioration.

Methods

- Rules — Matters for Discretion
- Information
- Design Guidelines
- Residential Zoning (Chapter 13 — Residential)
- Special Character Areas identified in Business Areas
- Incentives
- Reserve Management Plans

Policy

6.4.6 The assessment of effects on tangata whenua should occur in a way that respects tikanga Maori (Maori customary values and practices).

(This policy relates to objective 6.3.2).

Explanation/Reasons

The identification and recording of places of significance to tangata whenua will better enable their protection but this should not be done in a way that offends tikanga Maori. Sometimes tangata whenua prefer not to disclose the location of waahi tapu, particularly urupa (burial grounds) because they fear desecration of these sites. Section 42 is a new provision in the Resource Management Act relating to the protection of sensitive information. It can be used to avoid offence to tikanga Maori or to avoid the disclosure of the location of waahi tapu. It is appropriate that each hapu and iwi determines the protocol most appropriate for the protection of their waahi tapu.

Methods

- Resource consent, consultation, processing and hearing procedures
- Education and training of Council officers

Policy

6.4.7 Tangata whenua should be actively consulted where activities have the potential to adversely affect taonga or tangata whenua's relationship to taonga and in particular where development involves:

- "greenfield" subdivisions;
- coastal areas;

- activities near scheduled waahi tapu and archaeological sites;
- activities near identified archaeological sites;
- activity in the vicinity of papakainga areas;
- activities that can adversely affect inland waterways.
- public open space that contains heritage resources of value to tangata whenua

(This policy relates to objective 6.3.2).

Explanation/Reasons

Section 8 of the Resource Management Act requires that local authorities take into account the principles of the Treaty of Waitangi. There is no complete set of Treaty principles but the decisions of the Court of Appeal and the Waitangi Tribunal can be used as a guide to interpreting Section 8 of the Resource Management Act. Two key principles that have emerged from decisions of the Court of Appeal and the Waitangi Tribunal are those of partnership and active protection. The Parliamentary Commissioner for the Environment has indicated that in order for such principles to be fulfilled genuine consultation is required with tangata whenua (i.e. consultation is a process to help give effect to the principles of the Treaty of Waitangi).

Methods

- Resource Consent processes
- Council contracts for Resource Management services with representative tangata whenua authorities
- Agreement of understanding with representative tangata whenua authorities
- Active consultation with representative tangata whenua authorities in the development of Reserve Management Plans.

Policy

6.4.8 Options for the Council and tangata whenua to co-manage taonga in the Council's ownership should be investigated when assessing applications for development on Council land.

(This policy relates to objective 6.3.2).

Explanation/Reasons

Some sites of heritage significance to tangata whenua are part of the Council's public open space network. Section 6(e) of the Resource Management Act requires that local authorities recognise and provide for the relationship of Maori with their ancestral lands and other taonga and Section 7 of the Act requires local authorities to have particular regard to kaitiakitanga.

The active involvement of tangata whenua in the management and protection of taonga that are in Council's ownership is seen to be a way of recognising and providing for particular relationships of tangata whenua with their taonga. It is also a component of kaitiakitanga. The Planning Tribunal in Haddon v Auckland Regional Council 1994 NZRMA 49 stated that "where possible it is appropriate to give (the authority of iwi representatives) some empowering mechanism when it comes to development and

protection issues. Authority is meaningless without some power (ihi) which can be provided for and recognised."

Methods

- Resource consent procedures
- Co-management of public open space areas where they contain heritage resources of value to tangata whenua

6.5 HERITAGE STRATEGY

The essential elements of the Heritage Strategy include:

- the identification and regulatory protection of a diverse and representative range of buildings, objects, sites, areas, landscape, views and vegetation which are of particular historic, scientific, environmental, visual importance or community interest;
- the recognition that people's associations with places contributes to their heritage significance and although not always of outstanding architectural merit or other visible value they are of heritage worth;
- the recognition of the contribution that heritage makes to the City's image and form and that the protection of key heritage resources enhances the overall quality of the City's fabric;
- affording appropriate priority to the recognition and protection of tangata whenua taonga;
- the encouragement of voluntary protection of heritage by enhancing public awareness of the City's heritage and the provision of financial incentives;
- securing the cooperation of other relevant agencies, and the public to protect heritage resources.

A range of methods, both regulatory within the scope of the District Plan and non-regulatory measures outside the Plan, are applied to give effect to the Plan's objectives to protect the unique natural, physical and cultural heritage resources of the City and the relationship of the City's residents to those resources.

6.5.1 Natural Heritage

The City's landscape and maritime setting provide a sense of identity. The Council has identified key resources within this setting for protection. Special visual protection measures are applied to secure the highly appreciated maritime views associated with the harbours and the Gulf. Some of these views originate from public open space to ensure that the view is accessible to all.

A regional influence on the Manukau landscape is the dominance of the volcanic cones. Views to these resources contribute to the City's heritage and accordingly are managed by rules designed to preserve view shafts from significant public places. Rules prevent the loss or impairment of views by controlling the encroachment of structures within the chosen sightlines.

The physical landscape is an important determinant of the character and amenity of the City. Trees, bush, land contour and topsoil are particularly important. The conservation of the physical landscape assists in soil and water management, including the prevention of instability, erosion and siltation while also providing habitats for birds and other wildlife in the City.

Trees, both individually and in groups, are a significant element of Manukau City's landscape. They are a principal element in some neighbourhoods. Many are publicly owned and occupy streets and public open space areas, but the majority are privately owned and collectively endow the landscape with distinctive character and quality.

The Council recognises that the maintenance of a substantial tree cover within Manukau City is dependent on people's willingness to plant and manage their own trees. However, Council can lead by example on its own land and also educate people of the benefits of trees. It is from this position that tree protection initiatives in the District Plan have been formulated.

6.5.2 Cultural Heritage

Manukau's cultural heritage includes an assortment of buildings, objects, sites and areas, including those of particular importance to tangata whenua.

A range of methods both within and outside the Plan are applied to these resources. Varying levels of protection are offered according to the heritage value of the particular resource. Heritage resources are scheduled to ensure protection, whereas those items which are valued but are more abundant in quantity, and perhaps not of such quality, are afforded protection by use of non-regulatory techniques which encourage owners to protect the items.

It is also recognised that some cultural heritage resources need to be used and should not become museums. As outlined in the ICOMOS Charter the protection of a place of heritage value is usually facilitated by it serving a socially, culturally or economically useful purpose. In some instances, alterations and additions may be acceptable where they are essential to continued use, or where they are culturally desirable, or where the conservation of the place cannot otherwise be achieved. Any change, however, should be the minimum necessary and should not detract from the cultural heritage value of the place. Any additions and alterations should be sufficiently distinct that they can be read as new work.

6.6 IMPLEMENTATION

6.6.1 Regulatory Methods

6.6.1.1 Rules — Scheduling

The District Plan identifies particular heritage resources which are considered significant to Manukau City and worthy of protection in the public interest. These resources are listed in the following Schedules and are also identified on the Planning Maps. Scheduling and the associated rules is a method which offers a high degree of certainty, therefore Council has used this option for the most valued heritage resources within the City. The heritage resources listed in Schedules 6A, 6B and 6E have been evaluated using criteria. These criteria are part of Appendix 6A in the District Plan.

- Schedule 6A Buildings and Objects to be Protected.
- Schedule 6B Notable Trees and Stands of Trees to be Protected.
- Schedule 6C Species of Trees to be Protected
- Schedule 6D Wetlands to be Protected.
- Schedule 6E Geological Features and Areas to be Protected.
- Schedule 6F Waahi Tapu to be Protected.
- Schedule 6G Archaeological Sites to be Protected.

6.6.1.2 Rules — View Protection Shafts

The visual dominance of the volcanic cones within the City and the importance of maritime views is recognised by the Plan. Views to these features are managed by rules designed to preserve view shafts from significant public places. Viewshafts prevent the loss or impairment of views by controlling the encroachment of structures within the chosen sightlines.

The Plan imposes special height limits on certain areas in the City to protect significant views. In most zones the maximum height is below the height permitted by the view sightlines. However in some areas the maximum height exceeds that permitted by the view sightline. Only where the view sightlines are below the maximum height in the zone is it necessary to refer to the special height limits.

6.6.1.3 Resource Consent Procedures

Council will ensure that its internal resource consent procedures take into account the protection of heritage resources, particularly with regard compatibility with the requirements under the Historic Places Act 1993.

The Resource Management Act (S2(d) of the Fourth Schedule) requires consideration of “*any effect on natural and physical resources having aesthetic, recreational, scientific, historical, spiritual or cultural, or other special value for present or future generations.*” Therefore, any resource consent application for a site on which a heritage resource is located shall include an assessment of effects.

A number of databases or registers, not included in the District Plan, are available to assist identification of heritage resources. These include the Register of Heritage Resources, the Manukau City Cultural Heritage Inventory and the NZ Archaeological Association Site Record Files.

6.6.1.4 Flexible Development Controls

It is recognised in the Plan that development controls may place limitations on the use of heritage resources, particularly buildings. Accordingly the Plan attempts to offset these limitations by encouraging flexible controls wherever possible providing they do not compromise the heritage qualities being protected. For example, flexibility in the activities which can occur in heritage buildings is provided. Where development controls and rules are written into the District Plan discretion may be offered where those controls compromise the heritage values for which the item was scheduled. For example, the requirement to seal a driveway may not be appropriate for a 1840's cottage.

6.6.1.5 Other Chapters

The protection of heritage is integrated throughout the Plan. Matters of heritage importance which are not covered by this chapter are dealt with by policies, and rules in the following chapters:

Chapter 11	Coastal Environment and Surface of Rivers	Heritage Values
Chapter 12	Rural Areas	Conservation of Landscape Native Bush Protection
Chapter 13	Residential Areas	Heritage Zones
Chapter 15	Public Open Space	Public Open Space Heritage Zone
Chapter 9	Land Modification, Development and Subdivision	Consideration in Subdivision Design of Heritage resources
Chapter 17	Special Areas and Activities	Papakainga Areas Maori Purpose zones

6.6.2 Non Regulatory Methods

6.6.2.1 Advocacy

- **Register of Heritage Resources**

In addition to the Schedules which form part of the Plan, a register will be kept providing details on non-scheduled heritage resources which the Council considers should be recorded for public information. The Register offers no direct form of protection to these resources.

The main purpose of recording these non-scheduled resources is to acknowledge their significance and, by drawing attention to them as examples, to encourage efforts aimed at the full recording of the history of the City. The register will also contain information on scheduled resources such as buildings, trees, archaeological sites, and geological features. The full Register, which will be updated periodically, will be kept at the principal office of the Council and duplicates of information for each ward will be held at the appropriate service centre. The Register will be available at all reasonable times for inspection by interested persons.

- **Manukau City Cultural Heritage Inventory**

The Manukau City Cultural Heritage Inventory prepared by the Auckland Regional Council will be available for public inspection at the Council's principal office. The Cultural Heritage Inventory contains information similar to the Register of Heritage Resources however it does have a particular emphasis on archaeological sites.

- **Tree Register**

A Tree Register is available at the Council's principal office and at Service Centres to assist people in the identification of those species listed in Schedule 6C — General Tree Protection.

- **Information Pamphlets**

A range of pamphlets relating to heritage will be available to the public. These include the following:

- Guide to Tree Protection in Manukau City”
- “Suitable trees for smaller sites”
- “Work in close proximity to trees”
- “How to prune protected trees”
- “Guide to Heritage Building Protection in Manukau City”
- “Obligations under the Resource Management Act 1991 and Historic Places Act 1993 — Archaeological Sites”
- Conservation Plans
- Covenants

- **Technical Advice**

1 The Council has trained professionals who can advise on the following:

- Maintenance and management of trees
- How to undertake development and alterations which are complementary to the existing building and which do not compromise heritage values
- Appropriate colour schemes for particular period buildings.

2 The provision of staff to assist in any kaitiakitanga training programmes being developed by tangata whenua.

6.6.2.2 Services

The City's public open spaces and road berms contain a significant number of trees which contribute to the quality of the environment. As part of its Capital Works Programme, the Council continues to plant trees in these areas. These trees are protected by the Council's Tree Policy administered by Manukau Parks, and the District Plan.

6.6.2.3 Incentives

- Resource consent application fees for proposals affecting scheduled heritage resources are waived.
- Rates Relief for areas of native bush which meet specific height and area criteria.

- The Council operates a “Heritage Assistance Fund” to provide financial assistance to owners of heritage resources who undertake work to maintain that resource in the public interest.

Priority will be afforded to those resources which are scheduled in the District Plan, however other proposals will be considered. Applications for assistance can be made at any time to the Council’s Manager — Planning. Possible work eligible for assistance include the following:

- protective fencing of natural and cultural areas
- upgrading of earthquake risk buildings
- maintenance of a heritage resource
- conservation plans
- pest control associated with heritage habitats
- Resourcing representative iwi and hapu authorities, for example to undertake monitoring of resource consents, prepare iwi management plans and exercise kaitiakitanga.

6.7 ANTICIPATED ENVIRONMENTAL RESULTS

The anticipated environmental results for the heritage resources of the City are:

Buildings and Objects

- Presence of heritage resources including houses, churches, wells and gun emplacements and other objects.
- Owner participation in the protection of heritage resources.
- Greater public awareness of significant heritage resources in the City.

Residential Heritage Areas

- Presence of examples of residential areas that represent historic settlement patterns in the City.

Trees

- An increased awareness of the amenity, landscape and environmental value of trees and an appreciation of the need to properly manage trees.
- Presence of native bush and regenerating bush areas within the City.
- Presence of a diverse and representative range of native and exotic trees, including those of historic and landmark significance.
- The reduction of risk of irreparable damage being done to the City’s natural environment through unnecessary tree removal.
- Healthy environment (eg improved air quality).
- Increased birdlife in urban areas of the City.
- Reduced occurrence of natural hazards (eg soil erosion).

Views

- Retention of views from public places to heritage landmarks and resources.
- Enhanced townscape/landscape quality.

Archaeological Sites

- Retention and appreciation of archaeological sites for current and future generations.

Geological Features and Areas

- Retention and appreciation of a diverse and representative range of geological features for current and future generations.
- Increased public awareness of the volcanic heritage of the City.

Waahi Tapu

- Recognition and protection of Waahi Tapu.
- Participation of tangata whenua in processes set up to protect Waahi Tapu.
- Greater public awareness of tangata whenua heritage.

Habitat

- Retention of wetland areas in the City.
- Retention of significant habitat and associated fauna.

6.8 PROCEDURES FOR MONITORING

In order to assess the suitability and effectiveness of the objectives, policies and methods in achieving the anticipated environmental results contained in this chapter, the Council will develop a monitoring programme (see Chapter 1, Section 1.7.3) which may include the following monitoring procedures:

- Establishing base line information on heritage resources protected by the District Plan in liaison with the Auckland Regional Council, Department of Conservation, the NZ Historic Places Trust and other relevant public agencies and interested groups.
- Periodic surveying of the status and condition of heritage resources considered most at risk.
- Monitoring resource consents including compliance with consent conditions and the effectiveness of those conditions in protecting heritage resources.
- A survey of residents' level of awareness of significant heritage resources.
- Establishing an appropriate monitoring programme with Tangata Whenua.

6.9 RULES — ACTIVITIES

Rule

6.9.1 Activities involving Scheduled Heritage Resources

Activities involving Heritage Resources shall comply with the following:

- (a) All permitted activities in 6.9.2 Activity Table shall also comply with other zone based rules applying to heritage resources;
- (b) All discretionary activities in 6.9.2 Activity Table shall be assessed against those matters for discretion specified in Section 6.12 Assessment Criteria — Discretionary Activities together with the relevant matters set out in S.104 of the Act;
- (c) For notification procedures under the Resource Management Act 1991 see 5.2.2, 5.2.3, 5.2.4, and 5.3.3.1 of Chapter 5 General Procedures and Rules. Special care will be taken to consult with tangata whenua where their taonga may be adversely affected.
- (d) Unless special circumstances exist, applications for resource consent under rule 6.9 as restricted discretionary activities shall not be notified, and the written approval of affected persons need not be obtained.
- (e) For controlled activities section 94(i)(c) shall apply.

Rule

6.9.2 Activity Table

In the Table below, the terms used have the following meanings:

P = Permitted Activity

C = Controlled Activity

R(D) = Restricted Discretionary Activity

D = Discretionary Activity

ACTIVITY	ACTIVITY STATUS
Buildings and Objects	
Minor maintenance to heritage buildings or objects using the same or similar materials, scale, proportion and standards of finish to recognised conservation standards ¹	P
Any change of use permitted on the site under the relevant zone which is unrelated to the purpose for which the building or object was scheduled, and which does not detract from the qualities for which it was scheduled	P
Any alteration or modification to the interior of the scheduled building unless the interior is stated as being protected in Schedule 6A	P
Any alteration or modification to the interior of those buildings whose interiors are stated as protected in Schedule 6A	D
Any works or Activity which may have an Adverse Effect on any Scheduled Building or Object . [AM31]	D
Any alteration, modification or demolition to scheduled heritage buildings or objects which is not a permitted activity	D
To place, paint or extend a sign, flag or banner in association with a scheduled heritage building or object	D

ACTIVITY	ACTIVITY STATUS
Interpretative Signs on heritage buildings and objects not exceeding 0.5m ² at Howick Historical Village	P
Trees	
Regular minor trimming or pruning of any scheduled tree, bush or plant undertaken by hand operated tools except a chainsaw in accordance with accepted arboricultural practice which will not significantly alter the height or shape of that tree	P
Felling or destruction of any scheduled tree by the Council or a statutory authority, when it is required as an emergency work to maintain or restore power and communication links, or to safeguard life or property	P
Work on or removal of any scheduled tree on Council owned land by a Parks officer when the tree has undergone a decline in health and has become diseased and unstable	P
Any trimming or maintenance of any scheduled tree in Schedule 6B which is not a permitted activity	(R)D
Any trimming or maintenance of any tree specified on the list of species in Schedule 6C standing over 6m in height which is not a permitted activity	(R)D
Any works or activity which is proposed within the dripline of any scheduled tree or which may impact on the root system of the tree	(R)D
Removal of any scheduled tree	D
Any works or Activity which may have an Adverse Effect on any Scheduled Tree. [AM31]	D
View Shafts	
Construction or relocation of, or alterations and additions to any building or structure within an identified viewshaft where the completed building or structure will be below the height limit specified by a HSA applying to the site, or where the proposed height is lower than the contours shown on the planning maps, subject in all cases to the rules in the relevant zone chapter [AM170]	P
Construction, or relocation of, or alterations to, any building or structure within an identified viewshaft being a building or structure which exceeds the specified height limit [AM170]	D
Wetlands	
Any works or activity which may have an adverse effect on any scheduled wetland	D
Geological Features	
Any works or activity which may have an adverse effect on any scheduled geological feature	D
Waahi Tapu	
Special Site Rule: Any works which may have an adverse effect on the following scheduled waahi tapu:	
Ellets Mountain, Maunga Taketake 280, 292, 296 Ihumatao Road, Mangere	C
McLaughlins Mountain, Maunga Matukutueia 189 and 215 Roscommon Road, 48 McLaughlins Road, Wiri (Part only as indicated on Planning Map 19 and 20)	C
Puketutu Island, 600 Island Road, Mangere Bridge (Part only as indicated on Planning Map 2 and 3) [AM49]	C
Any works or activity which may have an adverse effect on any scheduled waahi tapu not being a controlled activity	D

ACTIVITY	ACTIVITY STATUS
Archaeological Sites	
Any works or activity which may have an adverse effect on any scheduled archaeological site	D

Notes:

1. Minor Maintenance Work could include activities such as painting (where a building or object has previously been painted), roof repairs, repair of rotting timbers, in cladding or joinery. Such work must respect the heritage qualities for which the object was listed for instance:

- Using the same or similar materials (eg. kauri weatherboards could if necessary be replaced by other wooden weatherboards of the same profile, however replacement with imitation wooden products such as Hardiplank would not be seen as an acceptable solution);
- Scale, proportion, finishes and techniques;
- Work should be in accordance with recognised conservation standards including ICOMOS NZ Charter.

6.10 RULES — MATTERS FOR CONTROL: CONTROLLED ACTIVITIES

Rule**6.10.1**

Council reserves control over the following matters in respect of any activity which may have an adverse effect on any scheduled waahi tapu.

- whether or not tangata whenua have been consulted
- whether any matters pertaining to the tangata whenua protocols need to be addressed
- whether the proposal affords appropriate acknowledgement of the waahi tapu status.
- whether or not the proposal allows for (takes into account) the necessary tangata whenua protocols.

6.11 RULES — MATTERS FOR DISCRETION: SPECIFIED RESTRICTED DISCRETIONARY ACTIVITIES

That the Council retains discretion over the following matters:

Rule**6.11.1**

Trimming, maintenance and undertaking of any activity within the dripline of any scheduled tree.

- The necessity for carrying out the works, including whether the tree is:
 - dying, diseased, damaged or has lost the qualities for which it was originally scheduled;
 - required to be removed from drainage systems, water courses or streams;
 - interfering with public utilities or other public works;

- causing serious damage to buildings or property;
 - causing significant or unusual hardship.
- (b) Whether the tree is significant in terms of species, age, size, condition and the genetic stock of the tree;
 - (c) Whether the work is required for compliance with any statutory or legal obligation under other legislation;
 - (d) Whether the extent of the proposal compromises the heritage values for which the tree was scheduled, and the contribution the tree makes to the setting;
 - (e) Whether the method to be employed is in accordance with accepted arboricultural practice;
 - (f) Whether the proposed activity within the dripline is likely to damage the tree or endanger its health;
 - (g) Whether the proposal will have any effects on soil stability;
 - (h) Whether the proposal can be altered to protect the qualities for which the tree was scheduled while still meeting the objectives of the applicant.

Explanation/Reasons

Extensive trimming without guidance and not in keeping with recognised arboricultural practices can destroy the quality of the tree. Trees are vulnerable and special care must be taken on all development sites where trees are to be maintained. They are vulnerable to site changes both above and below the ground.

Root systems are often damaged through excavation, compaction and grade change. The effect on the soil stability should also be assessed particularly in cases involving trees such as Puhutukawa on the coastal edge.

6.12 RULES ASSESSMENT CRITERIA: DISCRETIONARY ACTIVITIES GENERAL ASSESSMENT CRITERIA

6.12.1 General Assessment Criteria

For all discretionary activity resource consent applications relating to scheduled heritage resources, Council will have regard to the following assessment criteria and relevant matters set out in Section 104 of the Act:

- (a) whether the proposal has adverse effects on the heritage resource and the measures taken to avoid, remedy or mitigate potential adverse effects;
- (b) whether the proposed activity detracts from the heritage value of the resource;
- (c) whether the works or activity would wholly or partially nullify the effect of scheduling the heritage resource;
- (d) whether there is any change in circumstance that has resulted in a reduction of the value of the heritage resource since the resource was identified in the Plan;

- (e) whether there is sufficient time and expertise to record and document the heritage resource before the proposal occurs;
- (f) whether consultation has occurred with heritage organisations such as New Zealand Historic Places Trust and the Department of Conservation and any other Heritage Protection Authority or Community Group as appropriate;
- (g) whether the proposal is subject to the requirements of legislation other than the Resource Management Act, for instance the provisions of the Historic Places Act in relation to archaeological sites;
- (h) whether consultation has occurred with tangata whenua.

6.12.2 Additional Assessment Criteria: Specified Discretionary Activities

In addition to the General Assessment Criteria in 6.12.1, the Council will have regard to the following assessment criteria for the specified discretionary activities.

6.12.2.1 Alteration, modification or demolition to a scheduled building or object.

- (a) whether the building or object is classified in Group 1 or Group 2 and the reasons why it was scheduled;
- (b) whether the extent and nature of the proposed activity retains the style and character of the building or object;
- (c) whether the proposed alterations or modifications respect the original building, and are not visually dominant;
- (d) whether the relationship of the building or object with the setting is maintained;
- (e) whether there is a visual distinction between the original building and the addition. Whether any addition or alteration is sympathetic in form, scale, materials, building and opening proportions, and colour;
- (f) whether the restoration or repairs of the building or object (or part thereof) is proposed and the degree to which the proposed works meet the recognised conservation standards, including the ICOMOS NZ Charter;
- (g) whether the activity will keep loss of historic fabric to a minimum and avoid the destruction of valued materials and craftsmanship;
- (h) whether any alteration to the building or object can be made that retains the heritage value of the building or object while accommodating the objectives of the applicant;
- (i) whether the building or object can be relocated on or off the site and the impact that the relocation would have on the heritage value of the building, or object or the heritage site;
- (j) whether a conservation plan, heritage assessment or maintenance plan has been prepared for the building or object and the degree to which the proposal is in accordance with the conservation plan, heritage assessment or maintenance plan.

Explanation/Reasons

Alterations and modifications to scheduled buildings or objects could, without guidance, detract from the value and significance of the building or object and the reason for scheduling it. The assessment criteria ensure that all alterations and modifications are successfully accommodated within the building or object. In particular guidance is taken from recognised conservation standards, including the ICOMOS NZ Charter.

The style of a building determines the architectural and aesthetic value or significance of a building. The style of the existing building should be reflected in the design of the alteration with regard to the use of materials, the level of symmetry, the roof form and height, and detailing. Any addition or alteration should not compromise the majority of the building and should also not be visually dominant.

Authenticity is another determinant of the value or significance of a heritage resource, particularly for buildings. In order to retain the authenticity and integrity of the building, any alterations or modifications should be distinguishable as being new. Historic fabric and craftsmanship are two other elements which define the level of authenticity of the building. Repair promotes the retention of historic fabric, ensuring retention of craftsmanship. The final component of authenticity is setting. When alterations to a scheduled building are being considered, the design of the building in the context of its setting should be taken into account.

6.12.2.2 Placement, painting or extension of a sign, flag or banner in association with a scheduled heritage resource.

- (a) whether the sign is compatible with the heritage value of the building or site on which it is placed. For example, scale, dimensions, materials, colours and location.

Explanation/Reasons

Signs have the potential to compromise the heritage values of a site or building on which they are located, therefore their effects must be assessed.

6.12.2.3 Alteration or modification to the interior of a scheduled building whose interior is stated as protected in Schedule 6A.

- (a) whether the original plan form of the building is respected;
- (b) whether any significant architectural elements are conserved;
- (c) whether significant finishes are conserved.

Explanation/Reasons

New uses for scheduled buildings may involve the alteration of the interior. However, the plan layout and internal spaces contribute to the heritage value of some buildings. This interior reflects the style of the building. Architectural elements such as doors, panelling and architraves are usually designed to be consistent with the style of the building. They are also historic records of design and use of materials. Finishes such as columns, grained timber work and plastered ceilings are examples of craftsmanship and use of materials that are becoming scarce, therefore it is essential to retain them.

6.12.2.4 Removal of any scheduled tree.

- (a) The necessity for carrying out the works, including whether the tree is:

- dead, dying, diseased or has lost the qualities for which it was originally scheduled;
 - damaged beyond recovery;
 - required to be removed from drainage systems, water courses or streams;
 - interfering with public utilities or other public works;
 - causing serious damage to buildings or property;
 - causing significant or unusual hardship.
- (b) Whether the tree is significant in terms of species, age, size, condition and the genetic stock of the tree;
- (c) Whether the work is required for compliance with any statutory or legal obligation under other legislation;
- (d) Whether the tree can be relocated;
- (e) Whether the proposal can be altered to preserve the tree while still meeting the objectives of the applicant;

Explanation/Reasons

Trees protected by the District Plan may have heritage significance for a variety of reasons including botanical, historical/cultural, setting or context. The removal of a scheduled tree could result in adverse impacts on the landscape, amenity or environmental qualities of an area. It is important to consider whether the removal of the tree is warranted or whether there are alternative solutions, such as trimming or relocation which could be employed. Should it be considered necessary to remove a tree then the desirability of requiring replacement planting to remedy or mitigate the adverse effects of the tree removal should be assessed.

6.12.2.5 Construction or relocation of, or alteration and additions to any building or structure within an identified view shaft which exceeds the specified height limit.

- (a) whether the proposed activity undermines the view vertically or horizontally;
- (b) whether the proposed activity intrudes upon one or more of the view's focal elements;
- (c) whether the proposal removes existing intrusions or increases the quality of the view, particularly in relation to the focal elements.

Explanation/Reasons

Building activity within the viewshaft could, without control, destroy or impair the view. Views are made up of focal elements and context elements. The focal elements are what views concentrate on and it is unacceptable to intrude upon these unless the intrusion is minor. Context elements place the focal element in its setting within the wider context. These elements can be intruded upon but not to the extent where the framework is lost. Context elements are important, therefore the cumulative effect of building activity on the viewshaft shall also be considered. For example, with regard to Mangere Mountain, the volcanic cone itself is the focal element and the associated lava flows are the context element.

6.12.2.6 Any works or activity which will have an effect on any scheduled waahi tapu.

- (a) whether consultation has occurred with tangata whenua and there is written confirmation from any affected parties that the activity avoids, remedies or mitigates adverse effects on tangata whenua taonga.

Explanation/Reasons

It is not possible to fully appreciate the effects of development on tangata whenua taonga without consultation. Active consultation is seen to be taking account the principles of the Treaty of Waitangi as required by Section 8 of the Act.

SCHEDULE 6A — BUILDINGS & OBJECTS TO BE PROTECTED (SUBJECT TO RULE 6.9)

SCHEDULE 6C — SPECIES OF TREES TO BE PROTECTED (SUBJECT TO RULE 6.9)

This schedule applies to trees standing 6 metres or over in height in the following areas:

- (a) The Residential (Flora) Heritage Zone, except on an urban environment allotment [AM173]
- (b) The Coastal Protection Yard, except on an urban environment allotment [AM173]
- (c) Reserves (within the meaning of section 2(1) of the Reserves Act 1977) and areas subject to a conservation management plan or conservation management strategy prepared in accordance with the Conservation Act 1987 or the Reserves Act 1977
- (d) Any zoned land that is not on an urban environment allotment, except those sites zoned Rural 1, Rural 2, Rural 4, Mangere - Puhinui Rural zone, Mangere - Puhinui Heritage zone, and Airport zone. [AM173]

EXOTIC TREES	
Common Name	Botanical Name
Beech	<i>Fagus sylvatica</i>
Camphor Laurel	<i>Cinnamomum camphora</i> [AM98]
Cedar Atlas	<i>Cedrus atlantica</i>
Cedar of Lebanon	<i>Cedrus libani</i> "Sargentii"
Cedar Indian	<i>Cedrus deodara</i>
Chestnut Spanish	<i>Castanea sativa</i>
Chestnut Indian Horse	<i>Aesculus indica</i>
Chestnut Pink Horse	<i>Aesculus carnea</i>
Chestnut Horse	<i>Aesculus hippocastanum</i>
Coastal Redwood	<i>Sequoia sempervirens</i> [AM98]
Elm English	<i>Ulmus procera</i>
Elm Wych	<i>Ulmus glabra</i>
Elm Chinese	<i>Ulmus parvifolia</i>
Fig Port Jackson	<i>Ficus rubiginosa</i>
Fig Moreton Bay	<i>Ficus macrophylla</i>
Firewheel Tree	<i>Stenocarpus sinuatus</i>
Flame Tree (Illawarra Flame Tree) [AM98]	<i>Brachychiton acerifolius</i>
Ginkgo / Maidenhair Tree	<i>Ginkgo biloba</i>
Jacaranda Tree	<i>Jacaranda mimosifolia</i> [AM98]
Lime	<i>Tilia x europaea</i>
Lime Broad Leaf	<i>Tilia platyphyllos</i>
Magnolia Yulan	<i>Magnolia denudata</i>
Magnolia Sargents	<i>Magnolia sargentiana</i>
Magnolia Port Wine	<i>Michelia figo</i>
Magnolia Laurel	<i>Magnolia grandiflora</i>
Michelia	<i>Michelia doltsopa</i>
Monkey Puzzle	<i>Araucaria araucana</i>
Oak Holm	<i>Quercus ilex</i>

SCHEDULE 6C — SPECIES OF TREES TO BE PROTECTED (SUBJECT TO RULE 6.9)

This schedule applies to trees standing 6 metres or over in height in the following areas:

- (a) The Residential (Flora) Heritage Zone, except on an urban environment allotment [AM173]
- (b) The Coastal Protection Yard, except on an urban environment allotment [AM173]
- (c) Reserves (within the meaning of section 2(1) of the Reserves Act 1977) and areas subject to a conservation management plan or conservation management strategy prepared in accordance with the Conservation Act 1987 or the Reserves Act 1977
- (d) Any zoned land that is not on an urban environment allotment, except those sites zoned Rural 1, Rural 2, Rural 4, Mangere - Puhinui Rural zone, Mangere - Puhinui Heritage zone, and Airport zone. [AM173]

EXOTIC TREES**Common Name****Botanical Name**

Oak Pin

Quercus palustris

Oak Red

Quercus rubra

Oak Turkey

Quercus cerris

Oak English

Quercus robur

Oak Scarlet

Quercus coccinea

Pine Bunya

Araucaria bidwillii

Pine Norfolk Island

Araucaria heterophylla

Pine Hoop

Araucaria cunninghamii

Pink Tulip Tree

Magnolia campbellii

Plane Oriental

Platanus orientalis

Plane London

Platanus x acerifolia

Queensland Kauri

Agathis robusta

Red Flowered Gum

Eucalyptus ficifolia

Sweet Gum

Liquidambar styraciflua [AM98]

Tulip Tree

Liriodendron tulipifera

Walnut Common

Juglans regia

All sub-species and cultivars of the above exotic species shall be taken as read.

SCHEDULE 6C — SPECIES OF TREE TO BE PROTECTED (SUBJECT TO RULE 6.9)

This schedule applies to trees standing 6 metres or over in height in the following areas:

- (a) The Residential (Flora) Heritage Zone, except on an urban environment allotment [AM173]
- (b) The Coastal Protection Yard, except on an urban environment allotment [AM173]
- (c) Reserves (within the meaning of section 2(1) of the Reserves Act 1977) and areas subject to a conservation management plan or conservation management strategy prepared in accordance with the Conservation Act 1987 or the Reserves Act 1977
- (d) Any zoned land that is not on an urban environment allotment, except those sites zoned Rural 1, Rural 2, Rural 4, Mangere - Puhinui Rural zone, Mangere - Puhinui Heritage zone, and Airport zone. [AM173]

NATIVE TREES**Maori Name****Botanical Name**

Ewekuri	<i>Streblus banksii</i>
Hinau	<i>Elaeocarpus dentatus</i>
Horoeka	<i>Pseudopanax crassifolius</i>
Kahikatea	<i>Dacrycarpus dacrydioides</i>
Kaikomako	<i>Pennantia corymbosa</i>
Kamahi	<i>Weinmannia racemosa</i>
Kanuka	<i>Kunzea ericoides</i>
Karaka	<i>Corynocarpus laevigatus</i>
Kauri	<i>Agathis australis</i>
Kawaka	<i>Libocedrus plumosa</i>
Kohekohe	<i>Dysoxylum spectabile</i>
Kowhai	<i>Sophora tetraptera</i>
Kowhai	<i>Sophora microphylla</i>
Maire / Oro-oro	<i>Nestegis montana</i>
Maire (White)	<i>Nestegis lanceolata</i>
Maire (Black)	<i>Nestegis cunninghamii</i>
Maire tawake	<i>Syzygium maire</i>
Makamaka	<i>Caldcluvia rosifolia</i> / <i>Ackama rosaefolia</i> [AM98]
Mamaku	<i>Cyathea medullaris</i>
Manatu	<i>Plagianthus regius</i>
Manawa	<i>Avicennia resinifera</i>
Manawau / Manoao	<i>Lagarostrobos colensoi</i>
Mangeao	<i>Litsea calicaris</i>
Manoao	<i>Halocarpus kirkii</i>
Manuka	<i>Leptospermum scoparium</i>
Matai	<i>Prumnopitys taxifolia</i>
Miro	<i>Prumnopitys ferruginea</i>
Nikau	<i>Rhopalostylis sapida</i>

SCHEDULE 6C — SPECIES OF TREE TO BE PROTECTED (SUBJECT TO RULE 6.9)

This schedule applies to trees standing 6 metres or over in height in the following areas:

- (a) The Residential (Flora) Heritage Zone, except on an urban environment allotment [AM173]
- (b) The Coastal Protection Yard, except on an urban environment allotment [AM173]
- (c) Reserves (within the meaning of section 2(1) of the Reserves Act 1977) and areas subject to a conservation management plan or conservation management strategy prepared in accordance with the Conservation Act 1987 or the Reserves Act 1977
- (d) Any zoned land that is not on an urban environment allotment, except those sites zoned Rural 1, Rural 2, Rural 4, Mangere - Puhinui Rural zone, Mangere - Puhinui Heritage zone, and Airport zone. [AM173]

NATIVE TREES	
Maori Name	Botanical Name
Pahautea	<i>Libocedrus bidwillii</i>
Pink Pine	<i>Halocarpus biformis</i>
Pohutukawa	<i>Metrosideros excelsa</i>
Pokaka	<i>Elaeocarpus hookerianus</i>
Ponga	<i>Cyathea dealbata</i> [AM98]
Porakaiwhiri	<i>Hedycarya arborea</i>
Pukanui	<i>Meryta sinclairii</i>
Pukatea	<i>Laurelia novae-zelandiae</i>
Puriri	<i>Vitex lucens</i>
Rata (Northern)	<i>Metrosideros robusta</i>
Rewarewa	<i>Knightia excelsa</i>
Rimu	<i>Dacrydium cupressinum</i>
Ruakawa	<i>Ruakaua edgerleyi</i> [AM98]
Tanekaha	<i>Phyllocladus trichomanoides</i>
Taraire	<i>Beilschmiedia tarairi</i>
Tawa	<i>Beilschmiedia tawa</i>
Tawahairanui	<i>Nothofagus truncata</i>
Tawai	<i>Nothofagus menziesii</i>

APPENDIX 6A EVALUATION CRITERIA

The heritage resources listed in Schedules 6A, 6B and 6E have been evaluated using the following criteria. Resources in Schedule 6A have also been classified into two groups. The distinction between these two groups is outlined.

1 Buildings and Objects

A Criteria

The following criteria have been used in evaluating the features in Schedule 6A. The criteria are consistent with Section 6(f) of the Resource Management Act 1991 and are designed to withstand scrutiny within the context of that Act. The criteria provide a methodology for evaluation and consistency between features. [AM89]

(a) Historical

- (i) The extent to which the feature reflects important or representative aspects of New Zealand history or local history;
- (ii) Whether the feature is associated with (internationally, nationally, regionally or locally) historically important:
 - events
 - persons, groups or organisations
 - ideas
 - movements
 - social patterns
 - activities
 - developments or advancements;
- (iii) The potential of the feature to provide knowledge of New Zealand history or local history or teach us about the past;
- (iv) The association of the feature with the early periods of Maori or European settlement of New Zealand or of the City or district;
- (v) The significance of the age of the feature and the style or era or period to which it belongs.

(b) Importance to the community

- (vi) The importance of the feature to the tangata whenua;
- (vii) Whether the feature is an important element in the community's consciousness or makes a significant contribution to the uniqueness or identity of New Zealand or of the City or district;
- (viii) Whether the feature is a physical landmark;

- (ix) The symbolic or commemorative value of the feature.
- (c) **Aesthetic appeal**
 - (x) Whether the feature has aesthetic appeal or conforms to a past or present sense of beauty.
- (d) **Rarity**
 - (xi) The rarity or uniqueness of the feature.
- (e) **Architectural and use**
 - (xii) Whether the feature has architectural merit or interest, or is representative of a group or collection, or is one of the best examples of its type in New Zealand, the City or district;
 - (xiii) Whether the architect, engineer, designer or builder has made a special contribution to their profession or trade or whether the feature enlarges our understanding of their work;
 - (xiv) Whether the feature is the first or one of the first of its type in New Zealand or in the City or district or represents innovation in design, construction or use;
 - (xv) Whether the feature belongs to the Victorian–Edwardian period which is the foundation of New Zealand's architectural character.
- (f) **Technical**
 - (xvi) The technical accomplishment, value, or design of the feature; whether the feature is well-crafted or demonstrates an important application or high quality of building materials, methods and craft skills; whether the feature is representative of a vernacular practice.
- (g) **Integrity**
 - (xvii) The integrity of the historic fabric of the feature and the extent to which modifications or additions do not detract from the cultural heritage value of the feature; and whether the feature is still in its original use, providing visible evidence of the continuity between past, present and future.
- (h) **Setting**
 - (xviii) The contribution of the setting of the feature to its cultural heritage value; or the contribution of the feature to the streetscape, townscape or landscape.
- (i) **Context**
 - (xix) The extent to which the feature forms part of a wider historical and cultural complex or historical and cultural landscape.
- (j) **Cultural heritage value for present and future generations**
 - (xx) Whether the feature has aesthetic, archaeological, architectural, cultural, historical, educational, scientific, social, spiritual, technological, townscape, traditional or other special cultural value for present and future generations.

B Groups

All buildings and objects listed in Schedule 6A are classified into two groups according to their degree of importance and suitability for protection. The following distinctions can be made between the two groups:

Heritage features in Group 1 are distinguished from those in Group 2 by their higher quality (aesthetic, design, technical), rarity, innovation, historical value and significance, importance to the community (landmark, identity, community consciousness, commemorative) integrity (intactness, use) or wider significance (setting, landscape, representative or group value).

The protection of places in Group 1 is very important in that they represent a very valuable resource and their loss or degradation would be unacceptable to the community.

The loss or degradation of features in Group 2, while it should be avoided if at all possible, may be acceptable where there is no other alternative.

2 Notable Trees and Stands of Trees

A Criteria

Notable trees and Stands of Trees scheduled in the Plan have been assessed using the following criteria:

(a) Botanical Value

- any tree or species that is rare in the City, region or country.
- any tree or group of trees of ecological significance providing an important habitat for wildlife.
- any tree outstanding for its species in terms of its large diameter, height, age or canopy spread.

(b) Historical/Cultural Value

- any tree or group of trees associated with or commemorating an historic event.
- any tree or group of trees which has an historic association with a well known public figure or has strong public associations.
- any tree or group of trees that is strongly associated with a local historic feature and which now forms a significant part of that feature.
- any tree or group of trees of spiritual or cultural value to tangata whenua.
- any tree or group of trees having the potential to provide knowledge of or promote New Zealand history, local history and/or cultural values.

(c) Visual Appeal

- any tree or group of trees that have significant landmark value due to their location.
- any tree or group of trees which make a significant contribution to the visual amenity of the immediate environment.

(d) **Setting**

- The contribution of the setting of any tree or group of trees to its cultural heritage value or the contribution of the tree or group of trees to the streetscape, townscape or landscape.

(e) **Context**

- The extent to which any tree or group of trees forms part of a wider historical and cultural landscape.

3 Wetlands

A Criteria

In determining whether a wetland is worthy of protection the following factors are considered:

(a) **Ecological Value**

- The wetland has characteristics of representativeness or particular habitat types and/or has value because of its uniqueness, location or size;
- The wetland has habitat values which support species diversity (including genetic diversity), populations, community associations, or threatened species of plants and animals;
- The wetland is vulnerable to destruction or modification.

(b) **Scientific / Education / Cultural Importance / Amenity Values**

- The wetland is known to be of particular significance to tangata whenua and their cultural values;
- The wetland is of educational, scientific or passive recreational value;
- The wetland has landscape value or visual appeal.

4 Geological Features

A Criteria

In determining whether a geological feature or area is worthy of protection the following factors are considered:

(a) **Scientific/Educational Importance**

- The site or feature contains important scientific information which provides insight into past geological, volcanic or geomorphological activity.
- The site or feature provides scientific reference material for comparative identification.
- The site is vulnerable to destruction or modification.

- The feature is the best representative example in the Manukau City area of the different landforms, geological features and soil sites that together document the long geological history and evolution of the City.
- The feature is an important site for educational classes.
- The site or feature has scientific value as a record of cultural history.

(b) **Visual Appeal**

- The site or feature either on an individual basis or collectively makes a considerable contribution to the character of the immediate area or City.
- The site or feature forms a visual landmark within the City or region.
- The site or feature has scientific value as a record of cultural history.

(c) **Historic and Cultural Importance**

- The site is known to be of particular significance to tangata whenua or other ethnic groups for its religious, mythological, spiritual or other symbolic significance.
- The site or feature is associated with the life or activities of a person, group, organisation, or institution that has made a significant contribution to Manukau or New Zealand.
- The site or feature is associated with, and effectively illustrative of, broad patterns of cultural, social, political, military, economic or industrial history.
