Island: Papakohatu (Crusoe)	SES 46 (Site of Ecological Significance)	
-----------------------------	--	--

Description of Item

This site is of international importance to a threatened species, the white-fronted tern, with more than 1% of the total population breeding here. Reef herons (a nationally vulnerable species) breed here, as do blue penguins (which are in gradual decline nationally). Endemic variable oystercatchers also nest here, as do pied and little shags.
