	Plan Modification 24. Earthworks – Summary of S	ubmissions
No.	Relief Sought	Submitter Name
1/1	The existing provisions in the operative plan to remain.	Omiha Welfare and Recreation Society Inc
1/2	Reduce earthworks volumes by half.	
2	To turn down the proposed plan change.	Cheryl Backstrom
3/1	We want to see a regime for earthworks in which developers are encouraged not to change the landscape.	Matiatia-Oneroa Ratepayers and Residents Assoc. Inc.
3/2	Oppose this modification as it stands.	
3/3	We want to see the Plan consider BOTH area/slope and volume.	
3/4	Would also like to see incentives built in to the Plan so that people are encouraged not to do earthworks, and to minimise them when they must be done. Trade offs should be considered.	*
3/5	The cumulative effect of many individual earthworks should be taken into account.	*
4/1	6B.1.1.5 Supports proposed clause C that maintenance of existing roads will need to comply with erosion and sediment controls and that noise levels will be introduced	Peter Lumsden
4/2	in relation to heavy machinery used on earthwork sites. 6B.1.3.6 Proposed Clause E (iii) Where practical that fill from earthworks be deposited on site and subject to erosion and sediment controls. For fill that is required to be trucked away, strict controls should apply as to where	*
4/3	it can be dumped. Proposed Table 1. Standards for permitted activities. 3.6b Request with proposed earthworks on land with a slope less than 1 in 6 for all land units where it is shown \leq 400m ² of earthworks will be permitted that this be reduced to \leq 200m ² .	*
5	 Restrict times of acceptable noise level increase (Leq and Lmax) to 8am - 5pm on Mondays to Saturdays unless: a) absolute necessity to work at increased noise levels outside those times has been proven (eg house relocation), and all affected persons have been informed in advance. or b) written consent has been obtained from all persons who would have to endure the increased noise disruption. 	Inga Muller
7	Oppose the inclusion of plan change 24 Earthworks.	Tim Knight
8/1	To reject the Plan changes in their present form.	Friends of the Okahuiti Wetlands
8/2	Seek to uphold the views expressed in "Essentially Waiheke"	*
8/3	Seek to re define criteria so that the plan changes suit the specific attributes of the various islands rather than applying a blanket approach.	*
8/4	Council to broaden its s.32 analysis to include greater emphasis on non-economic aspects of effects.	*

9	Amend Part A, item 5 of proposed Plan Change 24 to include the following explanation of how the slope is to be measured:	Auckland City Council
	Slope means the slope of the land surface measured by the nearest route from the bottom to the top of the area of land to be disturbed. It should have an accuracy no less than that achieved by a hand held inclinometer or abney level.	
	Or similar wording to like effect.	
10/1	Halve the 400m ² chosen as a permitted activity.	Royal Forest and Bird Protection Society of NZ
10/2	Introduce rules that (a) keep the volume of earthworks down and (b) encourage the disposal of fill on the application site. If the transport of fill is unavoidable then the proposed 200m ³ should be a discretionary activity and beyond this point non-complying.	*
10/3	Earthworks should remain discretionary, rather than non- notified restricted discretionary, as under the existing plan.	*
10/4	Opposes the amendment to Policy Area 5 and Policy Area 7 that deletes reference to earthworks in the Oneroa Policy Area and the Ostend Sub-Area of the Okahuiti-Ostend-Tahi Policy Area as a controlled activity.	*
10/5	Supports the amendments to Clauses 6B.1.1.3 and 6B.1.1.5.	
10/6	Supports the change to Land Unit 2 to provide for nil earthworks as a permitted activity in this land unit. Supports the retention of nil earthworks as a permitted activity in Land Units 1 and 4.	Royal Forest and Bird Protection Society of NZ
10/7	The definition of earthworks should be amended by inserting "existing man-made" so that the last bullet point at the end of the final paragraph reads: "the clearing and maintenance of existing man-made farm drainage canals."	*
11	Part D: Amendments to part 6D - notification and information requirements - subclause (K). A simplified form of information be drawn up for small jobs or people will not be able to afford to apply.	George Samuel Medland
12	That a farmer can maintain and make farm tracks or roads as of right.	George Samuel Medland
13	To dig new drains as of right.	George Samuel Medland
14/1	Proposed Plan Change 24 be amended to include relevant provisions for the applicant's land at Matiatia as set out in Proposed Plan Change 38.	Waitemata Infrastructure Ltd.
14/2	Amend the Proposed Plan Change provisions so that the applicant's land at Matiatia in Land Unit 25 is distinguished from other Land Unit 25 locations by particular exclusionary provisions, exemption provisions or separate provisions.	*
14/3	In Part 6B.1.3.5.v(b) - Noise (Part A.4 of the Plan Change), a new exemption provision should be inserted	*

	(or similar remedy having like effect) that amends the	
	Land Unit 25 reference by adding in brackets;	
	"These provisions do not apply to Lot 8, DP 146325 at	
	Matiatia. In respect of that land, or any subsequent title arising	
	from subdivision of that land, the following provisions shall	
	apply: "Insert the relevant provisions set out in Plan Change	
	38, but insert provisions for the applicant's land within Land	
	Unit 25".	
14/4	Consequential amendments need to be made to all other	*
	relevant parts of the Proposed Plan Change.	
15/1	The provisions of Proposed Plan Change 24 be amended	Waitemata
	to include earthworks and noise provisions for the	Infrastructure Ltd.
	applicant's land as set out in Proposed Plan Change 38.	
15/2	Consequential amendments need to be made to all other	*
15/2		
10	relevant parts of the Proposed Plan Change.	PUL la alua au
16	No relief specified.	Jill Jackson
18/1	Request that earthworks for Great Barrier Island, outside	Great Barrier
	of Auckland Regional Council thresholds, be Permitted	Community Board
	Activity with suitable rules to protect adjacent sites from	
	sediment deposit.	
18/2	That proposed Part A Amendments 1, 2, 3 and 4 be	
	deleted.	
18/3	Request 6B.1.3.6B be amended to include LU1, 2 and 4.	
18/4	Request that proposed amendment to Clause	
	6B.1.3.7(B) and Table 1 be deleted.	
18/5	Request ARC rules replace proposed amendments to	
10/0	Table 1.	
20		Michael Lee: Member
20	and ask that this plan change be withdrawn.	Auckland Regional
	and ask that this plan change be withdrawn.	Council
21 and	Part D. Information requirements. Applicants are	
	Part D - Information requirements. Applicants are	Sean Deery and
47	required to submit an excessively comprehensive	Waiheke Community
	application. 1.K needs to be assessed by planners and	Board
	experts not applicants.	
22/1	Seeks such further incidental, consequential and other	The Cathcart Family
	amendments to the Plan Modification as may be	
	necessary to give effect to the issues raised in this	
	submission.	
22/2	Modify the plan change to account for integrated	*
	management principles and sustainable development in	
	conjunction with an adequate section 32 analysis.	
22/3	Part 6B: Vehicle Access, Roading, Noise and	*
	Earthworks.	
	(a) The noise standards are excessive for a rural area on	
	weekends and for the duration specified (particularly	
	adjacent to smaller lots).	
	(b) Soil "stockpiles" should not be left on sites exposed to	
	wind, and stormwater discharge, for more than 48	
	hours etc.	
	(c) Earthworks equipment should not be taken to areas	
	and washed down unless that area is properly	
	bunded and contained for sediment discharge, or for	
	that matter left on the site to produce run off from clay	
1	laden machinery (or should be covered from the rain).	
	(d) Mulch should be added (with appropriate diagrams)	

	to the measures which can be easily and effectively used to control sediment discharges (addition to the	
	Annexure) (e) Stormwater controls that keep "clean water clean"	
	should be added to the annexure guideline,	
	particularly where a "roof" is added to a house with	
	excessive lot coverage, there are no water tanks (to	
	start), and there is still exposed soil due to earthworks	
	and machinery at a construction site.	
	(f) Where appropriate, provisions should be added to the	
	plan that create an incentive to reuse excavated	
	materials on site to enhance the interest of the	
	landform (eg bank planting for additional mitigation,	
00/4	particularly with large lot subdivision on ridgelines)	*
22/4	Lower the noise standards to reflect the noise	
22/5	expectations in a rural environment. Add/modify the earthworks controls in accordance with	The Cathcart Family
22/0	the comments made in the submission.	The Californian Family
23	Revision of plan modifications that propose to impact on	Greenscene Ltd.
20	vegetation currently protected. Revision working party to	C. CONCOUNTO ELG.
	include experienced arborists.

A rule for disposal on site should be introduced and disposal off site generally not permitted. Retain existing controls	* * Liz Ross
31/3 31/4 31/5	HGIDP and the HGMPA. Supports the change from volume and slope and area Opposes the introduction of a new category of restricted discretionary activity. Strongly oppose quantities allowed, they should be at least halved to guarantee a sustainable management. A rule for disposal on site should be introduced and disposal off site generally not permitted.	* * <u>Liz Ross</u> Yvette Hewlett

	added on site disposal and differentiating between land units.	
36/2	Take into account the diverse Land Units created on	
30/2	Waiheke in the matter of earthworks, for example the	
	Objectives and Policies of Land Unit 9 are very much at	
	odds with a relaxation of the 'as of right' earthworks permissible.	
20/2		*
36/3	Suggest that the new regulations be added to, rather	
	than replacing, the old, so that the measure is the	
	existing cubic meterage or a square meterage, whichever	
00/4	is the lesser.	*
36/4	Consideration be given to encouraging 'on site disposal'	
	by permitting up to 30% more than the standard	
0=//	maximum measure if all disposal is on site.	
37/1	Part A: Amendments to part 6B.	Hanne Sorenson
	Support proposed amendment 2.	
	Support proposed amendment 6.	
37/2	Oppose proposed modification 9.3.6b Earthworks up to	*
	400m ² in LU 3, 5-15, 17-25 is too much.	
37/3	Excavated material should be disposed of on site.	*
38/1	Support the concept of determining earthworks by the	Robert Paul Morton
	square meterage of exposed ground/slope method,	
	rather than by the cubic meterage volume method.	
38/2	Every attempt should be made to dispose of excess	*
	material on site.	
38/3	Suggested 400m ² of exposed ground on a one-in-six	*
	slope [or less] is excessive.	
39/1	Concern at the introduction of the Restricted Non-Notified	Lynne Stewart
	Activity, where applicants no longer need to consult with	•
	neighbours.	
39/2	Support the concept of using slope and square metre	*
	exposed rather than the current cubic metre calculation.	
	Question the figure of 400 sqm which seems excessive	
	as a permitted activity.	
39/3		*
<u>39/3</u> 40	All surplus soil should be re-used on site.	* Carol Handin and
		* Carol Handin and John Ball
40	All surplus soil should be re-used on site. The current proposed changes must not be allowed.	
40 41/1	All surplus soil should be re-used on site. The current proposed changes must not be allowed. Amount of excavation as of right should not be changed.	John Ball
40	All surplus soil should be re-used on site. The current proposed changes must not be allowed. Amount of excavation as of right should not be changed. Do not make it easier for people to significantly alter land	John Ball
40 41/1 41/2	All surplus soil should be re-used on site. The current proposed changes must not be allowed. Amount of excavation as of right should not be changed. Do not make it easier for people to significantly alter land contours, leading to erosion and ugly scarring.	John Ball Carol Handin *
40 41/1 41/2 42	All surplus soil should be re-used on site. The current proposed changes must not be allowed. Amount of excavation as of right should not be changed. 1	abandonment of the "restricted discretionary" category	
	and overall no relaxing of the provisions for third party	
	involvement.	
48/4	All earthworks material must be re-used on site.	*
40/4	Reject Plan Changes.	Susan Washington
49/1	Excavated material must be disposed of on site.	*
		*
49/3	Earthworks must be notified and allow for third party involvement.	
50/1	Retain the exemptions from the definition of earthworks	Federated Farmers of
	for	New Zealand
	• Cultivation associated with agriculture or horticulture.	Incorporated
	• The digging of holes for the erection of posts.	•
	The cleaning and maintenance of farm drainage	
	canals.	
50/2	Include an exemption for the following from the definition	*
00/=	of earthworks: Agricultural activities associated with good	
	farm management practice, including but not limited to:	
	fencing, tilling/hoeing, soil cultivation and fertilisation, the	
	construction and maintenance of fences, shelter belts,	
	farm roads, stock races, farm drains and water supply	
	dams.	
51	Higher volumes, flexibility in design, more power to the	Mickey O'Shea
	titleholder.	
52	That this proposed amendment be deleted:	Kevin Richard Burke
	"No earthworks are permitted as of right in wetland/water	
	system yards."	-
53/1	ARC to leave work to Council. No need for two	Sean Jeremiah Mike
50/0	administrators.	O'Shea
53/2	Earth movement to be a permitted activity on farms.	* Sean Jeremiah Mike
E2/2	Canaanta ta ha minimaliaad	O'Shea *
53/3	Consents to be minimalised.	*
53/4	People shouldn't have to get consents to fill holes on properties.	
53/5	People shouldn't have to get consents to drains wet	*
55/5	areas or springs.	
53/6	People shouldn't have to apply to ARC when ACC is	*
55/0	already here. It's not rational to have two tiers of control	
53/7	People should be allowed to clear farm drains.	*
	People should be allowed to clear slips.	*
	People should be allowed to drain wetlands.	*
	Land Unit 9 needs a higher volume of permitted soil	*
	movement.	
53/11	Paper roads should be allowed to be developed with less	*
00,	cost and control.	
54/1	That there be higher volumes of earth work capability in	Michael O Shea
	land units 8 and 9.	
54/2	Existing use rights to be maintained. That farmers always	*
	be able to clear and maintain farm drainage canals.	
55/1	The title of annexure 1 be amended to read 'Guidelines	Cory Road Family
	for the Management and Control of Erosion and	Trust
	Sediment Control Measures for Earthworks'	
55/2	Any reference to visual assessment for earthworks	*
	specifically is not cross referenced to so-called significant	
	ridgelines and such other changes as the authority sees	

	fit to alway affect to the automication	
	fit to give effect to the submission. The Council rejects the proposed Amendments to Part	Lynette Loris Reed
57		Lynelle Lons Reed
57	6B in proposed Plan Change No 24.	Area Illian Tatlau
	That earthworks within Policy Area 7 remain as a	Ann Jillian Tetley
F 0	controlled activity along with specific assessment criteria.	Ann Illian Tatlay
58		Ann Jillian Tetley
50	- Oneroa no longer a controlled activity be withdrawn.	Area Lillion Totlov
59	That applications for permits to allow restricted	Ann Jillian Tetley
	discretionary activity should be notified.	Otanhan Jamas Tatla
60	That applications for permits to allow restricted	Stephen James Tetle
04	discretionary activity shall be notified.	
61	That the clause relating to Policy Area 5 - Oneroa be	Stephen James Tetle
	withdrawn.	
62	That earthworks within the Ostend sub area remain as a	Stephen James Tetle
	controlled activity.	
63	That the amendments and tables related to noise levels	Gordon Shirley
	be disallowed.	Hodson
64	That the proposed changes be disallowed.	Gordon Shirley
		Hodson
65	Accept most proposed changes but add the proposed	Lynnette Lawry
	slope-and-area criteria to the current Land Unit - specific	Gilmore
	volume limits. Possibly with some relaxation for on-site	
	disposal.	
66	Leave the cubic metre measures in to discourage soil	Joan Kirk
	removal which creates problems of disposal and add the	
	slope and surface area.	
	Amend as should not be uniform regardless of land unit.	Isobel Hawley
	Amend as should be "or" [current volume limit] whichever	*
	is less - possibly leeway if on-site disposal.	
67/3	Planners should revisit the particulars of this proposal	
68	These proposed changes do not go ahead.	Vanessa Pickering
69/1	The existing provisions in the District plan be retain. ACC	Stacey Shuck and
	should retain and rigorously enforce the existing	Simon Griffiths
	provisions in the District Plan, including the right of third	
	party involvement. Abandonment of the "restricted	
	discretionary" category. All earthworks material be re-	
	used on site.	
69/2	All large scale earthworks be notified.	*
r i i i i i i i i i i i i i i i i i i i	A combination of area and volume would be much more	*
	acceptable.	
70/1	The proposed modification rejected. The provisions in the	Leith Duncan
	present HG District Plan upheld.	
	All earthworks should be controlled more tightly and be	*
70/2	more resulcied not more liberally as envisioned by this	
70/2	more restricted not more liberally as envisioned by this plan change.	
70/2	plan change.	*
70/2	plan change. Earthworks should be minimised both in terms of area	*
70/2 70/3	plan change. Earthworks should be minimised both in terms of area exposed and volume, and all material retained on site.	
70/2 70/3 71/1	plan change. Earthworks should be minimised both in terms of area exposed and volume, and all material retained on site. Withdraw the proposed plan changes.	
70/2 70/3 71/1 71/2	plan change. Earthworks should be minimised both in terms of area exposed and volume, and all material retained on site. Withdraw the proposed plan changes. Restrict earthworks to an essential minimum.	Lyndsay Lee Meager
70/2 70/3 71/1 71/2	plan change. Earthworks should be minimised both in terms of area exposed and volume, and all material retained on site. Withdraw the proposed plan changes. Restrict earthworks to an essential minimum. Require all earthworks over 20m ³ to be notified to provide	Lyndsay Lee Meager
70/2 70/3 71/1 71/2 71/3	plan change. Earthworks should be minimised both in terms of area exposed and volume, and all material retained on site. Withdraw the proposed plan changes. Restrict earthworks to an essential minimum. Require all earthworks over 20m ³ to be notified to provide incentive for applicants to come up with low- impact	Lyndsay Lee Meager
70/2 70/3 71/1 71/2 71/3	plan change. Earthworks should be minimised both in terms of area exposed and volume, and all material retained on site. Withdraw the proposed plan changes. Restrict earthworks to an essential minimum. Require all earthworks over 20m ³ to be notified to provide	Lyndsay Lee Meager

 71/5 Require that excavated material is disposed of on site. Transporting fill from one place to another is an admission of design incompetence. 71/6 Undertake a vigorous information campaign about the cumulative effect of excavating, transporting and dumping fill on the degradation of coastal waters. 71/7 Object to the non-notified "restricted discretionary activity" category. 72/1 Support the proposed introduction of greater controls on erosion, and sediment and the introduction of tighter construction noise standards for earthworks. 72/2 Retain the existing conditions. Do not introduce non- notified restricted discretionary activity category. 72/4 Introduce requirement for all fill resulting from major earthworks (more than 100 cu.m) to be disposed of on site. 73 That the plan be withdrawn in favour of the status quo. Preference is for a policy which encourages minimal earthworks (more than 100 cu.m) to be disposed of on site. 74 Amend Part 6 D: Addition to subclause 1K. Include a specific provision requesting that; applicants must demonstrate the sustainable reuse of fill generated from earthworks with preference for on site retention. Part D Amendments to Part 6D – Notification and Information Requirements. Addition to subclause 1K: For earthworks applications, the description of the activity shall include the following: - replace - the amount of fill (in cubic metres) etc - with - information as to how the fill will be reused on site, or explanation as to the amount of fill (in cubic metres) to be transported by public road and as to how the fill is to be reused on site of destination. 76/1 Part A: Amendments to Part 6B - Standards for Permitted Activities, item 9 of the proposed plan change insert a column for Land Unit 26 Rotoroa Island. Allow ≤ 500[∞] of earthworks on land with a slope >1 in 6 as a permitted activity. Allow ≤ 400m[∞] of earthworks to include the	 Transporting fill from one place to another is an admission of design incompetence. 71/6 Undertake a vigorous information campaign about the cumulative effect of excavating, transporting and dumping fill on the degradation of coastal waters. 71/7 Object to the non-notified "restricted discretionary activity" category. 72/1 Support the proposed introduction of greater controls on erosion, and sediment and the introduction of tighter construction noise standards for earthworks. 72/2 Retain the existing provisions for cubic metre limits in addition to the proposed consideration of slope. 72/3 Retain the existing conditions. Do not introduce nonnotified restricted discretionary activity category. 72/4 Introduce requirement for all fill resulting from major earthworks (more than 100 cu.m) to be disposed of on site. 73 That the plan be withdrawn in favour of the status quo. Preference is for a policy which encourages minimal earthworks 74 Amend Part 6 D: Addition to subclause 1K. Include a specific provision requesting that; applicants must demonstrate the sustainable reuse of fill generated from earthworks with preference for on site retention. Part D Amendments to Part 6D – Notification and Information Requirements. Addition to subclause 1K: For earthworks applications, the description of the activity shall include the following: replace - the amount of fill (in cubic metres) etc with - information as to how the fill will be reused on site, or explanation as to the amount of fill (in cubic metres) etc with - information as to the amount of fill (in cubic metres) to be transported by public road and as to how the fill is to be reused on site of
admission of design incompetence. 71/6 Undertake a vigorous information campaign about the cumulative effect of excavating, transporting and dumping fill on the degradation of coastal waters. Lyndsay Lee Meager 71/7 Object to the non-notified "restricted discretionary activity" category. • 72/1 Support the proposed introduction of greater controls on erosion, and sediment and the introduction of tighter construction noise standards for earthworks. • 72/2 Retain the existing provisions for cubic metre limits in addition to the proposed consideration of slope. • 72/3 Retain the existing conditions. Do not introduce nonnotified restricted discretionary activity category. • 72/3 That the plan be withdrawn in favour of the status quo. Preference is for a policy which encourages minimal earthworks (more than 100 cu.m) to be disposed of on site. Janet Hunt 74 Amend Part 6 D: Addition to subclause 1K. Include a specific provision requesting that; applicants must demonstrate the sustainable reuse of fill generated from earthworks applications, the description of the activity shall include the following: replace - the amount of fill (in cubic metres) etc with - information as to hwt the is not possible and subsequent information as to the amount of fill (in cubic metres) to be transported by public road and as to how the fill will be reused on site, or explanation as to they the site or explanation as to why this is not possible and subsequent information as to the admithe aslope >1 in 6 as a permitted activity.<th>admission of design incompetence. in 6 as a permitted activity.	
	• Allow \leq 400m ² of earthworks on land with a slope \leq 1
following standards for Rotoroa Island:	
Part B: Amendments to Part 6C - Standards for	
Discretionary Activities, item 5 of the proposed plan	
change,	
	 Insert a column; for Land Unit 26 Rotoroa Island.
	 Insert a column; for Land Unit 26 Rotoroa Island.

	 Provide for >50m² of earthworks on land with a slope > 1 in 6 as a restricted discretionary activity. Provide for > 400m² of earthworks on land with a slope Auckland Regional Council: Environmental Management ≤1in 6 as a restricted discretionary activity. 	
77	Proposed Plan Change 24 being adopted.	Auckland Regional Council
78/1	 A second look at all the proposed changes, bearing in mind that 1) Earth displaced poses even more serious problems. 2) The area/slope formula (better in some ways) can lead to increased volumes 3) That early scrutiny of building location and design could help minimise earthwork (and cost) 	Donald Leigh Chapple
79/1	Provide for all farm tracks /roading to be a permitted activity subject to reasonable erosion and sediment control.	Martin Philip Mitchener
79/2	That all new public roading be a permitted activity, together with all realignment of existing roading.	*
80/1 80/2	Provide for the digging of new drains - making of new fence lines and maintenance of farm tracks. That farmers be exempt from these earthwork controls.	Charles George Blackwell *
81/1	Council accepts the proposed Plan Change 24.	Lance Dixon and Isabel Fordham
82/1	Further public consultation.	Valerie E. White
