

Low Impact Design Manual for The Auckland Region

Primary Author: Earl Shaver
Contributors: Harrison Grierson Consultants Ltd
Beca Valuations Ltd
Julie Turner

In addition, there was a focus group which reviewed all information that has been developed, and those individuals should be recognised.

Ron Goodwin	Wilbow Corporation
Kevin Lynch	
Steve Scott	McConnell Dowell Construction Ltd.
Bill Kapea	Te Hao O Ngati Whatua
Kenneth Catt	Forest & Bird, Auckland Region
Ross Nixon	Universal Homes Limited
Saul Roberts	Te Kawerau A Maki Trust
Allan Leahy	Harrison Grierson Consultants Limited
Peter Nagels	North Shore City Council
Michaela Cosijn	Rodney District Council
Gary Maskill	District Council of Papakura
Craig Bond	Harrison Grierson Consultants Limited
Pat Holm	Manukau City Council
Mike Butler	Waitakere Branch, Forest & Bird
Lois Easton	Waitakere City

Auckland Regional Council
Technical Publication No. 124, April 2000.
ISSN 1175 205 XP
Printed on recycled paper

Index

Introduction

Purpose	i-1
Background	i-3
Problem Statement	i-6
Limitations of Existing Practices	i-8
Low Impact Design Approach	i-12
Catchment Wide Approaches	i-14
Organisation of Manual	i-15

Chapter 1

Importance of Site Disturbance on Erosion and Sediment Control

Introduction	1-1
Depositional History	1-2
Soil Type	1-4
Area of Disturbance	1-7
Slope angle and Length	1-10
Vegetative Cover	1-13
Vicinity of Receiving Environments	1-15
Performance of Traditional Erosion and Sediment Control Practices in Terms of Sediment Retention and Sediment Yield	1-16
Site Development Approach	1-18
Bibliography	1-19

Chapter 2

Importance of Water Cycle in Stormwater Management

The Water Cycle	2-1
Precipitation	2-3
Groundwater Considerations	2-4
Stormwater Quantity	2-6
Stormwater Quality	2-9
Stream Morphology	2-12
Stream Ecology	2-15
Importance of First and Second Order Streams	2-20
Bibliography	2-22

Chapter 3

Site Resources

Introduction	3-1
Terrestrial Ecology and Landscape Form	3-1
The Ecological Value of Site Resources	3-2

Wetlands	3-6
Floodplains	3-8
Riparian Buffers	3-11
Vegetative Cover	3-14
Slopes/Topography	3-17
Other Natural Features	3-18
Linkage with Site Development	3-19
Natural Mechanisms for Stormwater Pollution Removal	3-20
Bibliography	3-21

Chapter 4

Low Impact Design Approach

Introduction	4-1
Low Impact Design Principles	4-1
Approaches and Techniques	4-3
Clustering and Alternative Lot Configuration	4-4
Reduction in Setbacks	4-8
Reduction in Imperviousness	4-9
Low Impact Design Approach: Minimum Site Disturbance	4-16
Vegetated Filter Strips and Buffers	4-17
Vegetated Swales	4-19
Rain Gardens	4-22
Use of Natural Areas Including Reforestation and Revegetation	4-23
Water Reuse	4-24
Bibliography	4-25

Chapter 5

Design Procedures

Introduction	5-1
Design Procedure in Overview	5-1
Site Analysis/Factors Inventory	5-3
Runoff Curve Number Discussion	5-5
Time of Concentration Discussion	5-6
Additional Stormwater Controls as Needed	5-6
How to Measure Success	5-7
Other Types of Development	5-9
Bibliography	5-10

Chapter 6

Case Studies

Introduction	6-1
Chapter Organisation	6-2
Site Lot Yield	6-2
Site Conditions	6-2
Rainfall	6-3
Site 1	6-3
Site 2	6-5
Site 3	6-7

Index

References	6-9
Appendix 1 - Case Study 1	6-10
Model Inputs	6-11
TP 108 Modelling Results	6-14
Case Study 1 Volumes Analysis	6-20
Case Study 1 Site Plans	6-22
Appendix 2 - Case Study 2	6-30
Model Inputs	6-31
TP 108 Modelling Results	6-34
Case Study 2 Volumes Analysis	6-40
Case Study 2 Site Plans	6-42
Appendix 3 - Case Study 3	6-50
Model Inputs	6-51
TP 108 Modelling Results	6-54
Case Study 3 Volumes Analysis	6-60
Case Study 3 Site Plans	6-62

Chapter 7

Institutional Discussion

Introduction	7-1
Resource Management Act	7-1
Regional Policy Statement	7-3
Regional Plans	7-3
Transitional Regional Plan	7-4
District Plans	7-4
Other Mechanisms	7-5
Integrated Management	7-6
Integrated Solutions	7-8
Bibliography	7-9
Appendix	7-10
